

WATER LESS URINAL

zerodor™
WATERLESS URINALS

Zerodor is a revolutionary waterless urinal technology which can save over **1,51,000 litres** of water per year per urinal. That is one whole year of **14 families** getting access to water. It's patented mechanism does not use chemicals or consumables and can be retrofitted into existing urinals.

ZERODOR
FITTED
URINAL

No Consumable Cartridge

Low Maintenance

Saves Upto 1.5 Lakh Liters of Water Every Year

Saves Money. ROI in 1-3 Months.

No Flushing

No Power Required

Fresh & Odour Free

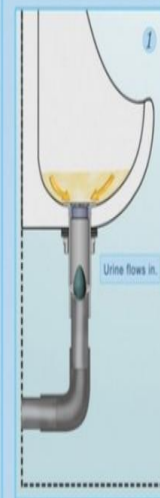

Easy to Clean

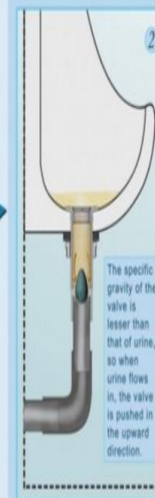

**SAVES WATER
REMOVES
ODOUR**

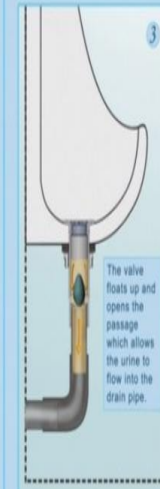

Zerodor™ is a patented Waterless Urinal technology which does not use any chemical. Zerodor™ can be retrofitted into existing urinals. There is no consumable/cartridge inside Zerodor™. There is no recurring cost associated with it.

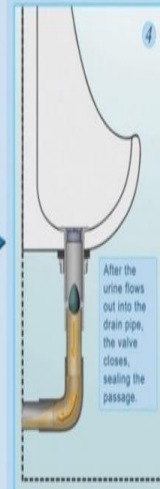

Urine flows in.

The specific gravity of the valve is lesser than that of urine, so when urine flows in, the valve is pushed in the upward direction.

The valve floats up and opens the passage which allows the urine to flow into the drain pipe.

After the urine flows out into the drain pipe, the valve closes, sealing the passage.

Urine, when left to react with water, releases ammonia in the drain pipe which generates foul odour.

In Conventional urinal ammonia from the drain pipe gets released in the rest room leading to bad odour and foul smell.

Zerodor™ acts as a barrier and does not allow the foul odour to come out from the drain pipe and keeps the restroom odourless while conserving water.
